INSTALLATION |

Skirting Installation—with adhesive & nails

1. Apply adhesive on the back of the skirting.

2. Press skirting against the wall and support it with something heavy until it has cured so that it will not pop off the wall.

3. Use finish nails in the skirting every 40cm and Finish up the nails with a color matching Color Fill.

Skirting Installation—with buckle

1. Cut a 20cm piece and install the buckle as shown. Mark the position of buckle on the wall every 40cm.

2. Fix the buckles with nails.

3. Install the skirting with the buckle.

Flooring Transition Installation

1. Install the flooring by leaving a 25mm gap between two planks
2. Center the PVC track between two floors and screw it to sub floor
3. Gently press the molding into the track starting from one end to the other

1. Install the flooring by leaving space besides the plank
2. Screw the PVC Track besides the planks
3. Gently press the molding into the track starting from one end to the other

1. Install the riser flush to the Stair. Leave 35mm distance between the outer edge of the riser and the floor.
2. Screw the PVC Track besides the planks
3. Gently press the molding into the track starting from one end to the other
